ARTIFICIAL INTELLIGENCE
Simulation of human intelligence in machine learning

The Future is Here.

What do you want to do? Who do you want to become?

Every week, every session, every exercise is built to produce writing, planning, analysis, visuals, ideas, products, and a final launch-ready project.

**Live Online 17 Feb. 2026 – 7 Mar. 2026
Tues. & Thurs. 6:00 PM–8:00 PM ♦ Sat. 2:00 PM – 4:00 PM ET**

Training Objective:

By the end of the program, you'll confidently use it safely for real work and master structured prompting and DRILL™. You'll reliably write, plan, analyze, create multimedia, and solve problems with high-quality outputs backed by verification and leave with job-specific workflows plus a launch-ready capstone you can use immediately.

Training Outcomes:

a. Understand what AI is, isn't, can do, and can't.
b. Communicate with AI clearly using structured, effective prompting frameworks for accurate output.
c. Write, plan, forecast, and analyze tasks using AI.
d. Create visuals, graphics, photos, videos, and professional multimedia outputs.
e. Generate ideas, explore solutions, and solve real problems creatively.
f. Develop digital products and assets powered by practical AI workflows.
g. Apply AI to your specific job, field, or business.
h. Complete a real project you can launch immediately after training.
